

DETER PARQUET IN & OUT

Wood detergent, ideal for the cleaning of wooden flooring and products both indoor and outdoor

- ✓ Ideal for the ordinary cleaning of painted parquet
- ✓ Ideal for the ordinary cleaning of outdoor wooden flooring (both painted and oiled)
- ✓ Excellent degreasing action
- ✓ Concentrated
- ✓ Wax free

Code SO9050

Highly concentrated detergent based on surface-active agents and natural soaps. DETER PARQUET is designed for the thorough cleaning of varnished parquet (traditional and pre-finished), all oiled and varnished surfaces located outdoor (shutters, windows, garden furniture, decking, wooden terraces, etc.) and for the ordinary cleaning of WPC decking. DETER PARQUET can also be used on oiled wood surfaces (for extraordinary maintenance) and to remove greasy dirt and wax build up. Suitable for both professional and domestic use.

DILUTION

Lightly soiled surfaces: 1 cap per litre water
Heavily soiled surfaces: Max. 5 caps per litre water

APPLICATION

ORDINARY MAINTENANCE OF VARNISHED PARQUET

- Vacuum the floor.
- In a bucket of water pour properly diluted DETER PARQUET (see table above).
- Wipe the floor with a soft cloth or a mop soaked in the solution and well wrung. If necessary, rinse the cloth in clean water every now and then, to remove the dirt, then continue to wash with the detergent solution.
- LEAVE THE FLOOR TO DRY WITHOUT RINSING

According to the wear and the foot traffic the floor is exposed to, follow up the washing treatment with one of our other products, as below: RAVVIVANTE or READY POLISH PARQUET (see related Technical Data Sheets)

When using DETER PARQUET as a degreasing treatment for extraordinary maintenance of oiled parquet floors, contact our Technical Assistance service.

ORDINARY MAINTENANCE OF OUTDOOR WOODEN SURFACES

- In a bucket of water pour properly diluted DETER PARQUET (see table above).
- Wash the surfaces with a well wrung sponge or cloth (or mop if washing flooring).
- LEAVE THE FLOOR TO DRY WITHOUT RINSING

For oiled surfaces, depending on the amount of wear and if necessary, use after treatment with EXTEROL 050 (see TECHNICAL DATA SHEET).

WARNINGS

- The product must only be diluted in water.
- We recommend the use of two buckets: one with the detergent solution, the other with clean (warm) water, to regularly rinse the cloth to remove dirt.
- WARNING! As a general rule, wood surfaces should not be drenched lots of liquid, but wiped with well wrung cloths or mops.
- At low temperatures the product may become cloudy, while at temperatures close to 0°C the product freezes and solidifies. To restore it, however, it is sufficient to leave it for a few hours at at least 20°C.

SAFETY INFORMATION

Contains, in compliance with the Detergents Directive No. 648/2004: equal to or above 5% but less than 15% soap, maximum 5% amphoteric surfactants, maximum 5% EDTA and salts, perfume.

TECHNICAL DATA

(with room temperature of +23°C and 65% relative air humidity)

Appearance	Transparent yellowish liquid
Viscosity	17°F4 ± 3°F4
pH	9.5 ± 0.5
Specific weight	1.00 ± 0.02
Dilute with	water
Max. dilution	1:100
Average yield of the diluted product	20-30 m ² /l

Protect from freezing!

Never dispose of residues into the ground or drainage system!

If the original unopened containers are stored in a cool and dry place, the product will keep for 12 months.
