

# PRONTO POLISH PARQUET

## Protective regenerating detergent

- ✓ Cleans and restores varnished parquet
- ✓ Will not alter the original matt finish on treated floors
- ✓ Suitable for ordinary and special maintenance

Code **SO9070**

Protecting and regenerating self-polishing detergent, based on biodegradable surfactants and waxes in aqueous emulsion for the maintenance of finished wooden floors. Easy and fast to spread, the product allows the removal of dirt, leaving a very light protective layer on the treated surface, which delays deterioration without altering its natural slipperiness and without modifying its original opacity. These properties make the product especially suitable for treating matt surfaces, also in public and high-traffic environments.

POLISH PARQUET is suitable for both professional and domestic use. It is ready to use or can be diluted in water.

## DILUTION

**Frequent maintenance:** 5-10 caps per litre of water

**Special maintenance:** Neat or diluted 1:1 in water (1 litre product in 1 litre water)

## APPLICATION

- Vacuum the floor.
- Dilute PRONTO POLISH PARQUET (if necessary) with water (see DILUTION TABLE) based on the type of treatment to be carried out.
- Apply the solution evenly with a well squeezed damp cloth. Every now and then rinse the cloth in clean water to remove any dirt.
- LEAVE the treated floor TO DRY before walking upon it.
- Do not rinse the treated floor.

## NOTICE

- In case the floor appearance does not turn out uniform, buff the surface with a soft felt.
- The product is not suitable for unvarnished wooden floors.
- The product must only be diluted in water.
- ATTENTION! As a general rule, wood floors should not be flooded with plenty of liquid, but wiped with moist and well wrung clothes or mops.

## SAFETY INFORMATION

Ingredients (Reg. UE 648:2004):

- Non ionic surfactants <5% • 1,2-Benzisothiazolinone-3(2H)-one • 2-Methyl-4-isothiazolin-3-one

Safety information data sheet available on request.

## TECHNICAL DATA

(based on room temperature of +23°C and 65% of relative air humidity)

|                 |                         |
|-----------------|-------------------------|
| Appearance      | Milky white liquid      |
| Viscosity       | 12"F4 ± 2 "F4           |
| pH              | 7.5 ± 0.5               |
| Specific weight | 1.00 ± 0.01             |
| Diluent         | water                   |
| Dilution        | max. 1:20               |
| Average yield   | 20-40 m <sup>2</sup> /l |

**Protect from freezing!**

**If the original unopened container is stored in a cool and dry place, the product will keep for at least 12 months.**
