A few precautions for use...

The first cleaning/maintenance intervention on a varnished wood floor must be performed **not earlier than 10 days from the application of the last finishing (15 days in the case of oiled or waxed flooring).**

Prior to washing: vacuum or sweep the floor to remove dust.

Place a mat at the entrance to avoid scratches.

Place protections under the feet of the furniture and chairs.

As a general rule, wood floors should not be soaked in plenty of liquid, but wiped **with moist and well wrung cloths.**

Do not use aggressive cleaning agents, bleach, alcohol-based products or products that are abrasive or with silicon content.

Varnished
wood floor

DETER PARQUET

Concentrated detergent to be diluted in water, for in-depth cleaning of varnished wood floor (traditional and pre-finished).

- Excellent degreasing and cleaning action
- Regenerates the original state of the finish
- Wax free

INSTRUCTIONS FOR USE

STANDARD USE

1. Vacuum the floor.
2. Dilute 1-2 caps of DETER PARQUET in approx. 1 litre water.
3. Wipe the floor with a soft cloth or a mop soaked in the solution and well wrung.

We recommend the use of two buckets: one with the detergent solution, the other with clean (lukewarm) water, to regularly rinse the cloth to remove collected dirt.

4. Let dry without rinsing.

PROFESSIONAL TIPS

According to the wear and the foot traffic the floor is exposed to, follow up the washing treatment with one of our other products, as below: RAVVIVANTE or PRONTO POLISH PARQUET for varnished floors.

STANDARD
USE

To be diluted

PRONTO POLISH PARQUET

Self-polishing, protective and regenerating detergent for the maintenance of varnished wood floor. Easy and fast to apply, the product allows removing dirt while leaving a thin protective layer on the floor.

- It does not make the wood more slippery
- Suitable for use on matte surfaces
- Suitable both for ordinary and extraordinary maintenance

INSTRUCTIONS FOR USE

1. Vacuum the floor.

ORDINARY MAINTENANCE

2. Dilute PRONTO POLISH PARQUET with water (see technical data sheet).
3. Wipe the floor with a soft cloth or a mop soaked in the solution and well wrung.
4. Let dry without rinsing.

EXTRAORDINARY MAINTENANCE

2. Wash the floor with DETER PARQUET (see technical data sheet).
3. Pour PRONTO POLISH pure or diluted with water 1 :1, in a bucket and distribute it evenly using a moist cloth.
4. Let dry without rinsing.

STANDARD
USE

To be diluted

EXTRAORDINARY
USE

Ready
to use

PROFESSIONAL TIPS

We recommend the use of two buckets: one with the detergent solution, the other with clean (lukewarm) water, to regularly rinse the cloth to remove collected dirt.

RAVVIVANTE

A concentrated regenerating protective agent for the maintenance and protection of varnished wood floors.

- Particularly suited for varnished wood floor, both semi-glossy and glossy
- Ideal to bestow renewed beauty to the floor where the varnish is worn
- Suitable both for ordinary and extraordinary maintenance

INSTRUCTIONS FOR USE

1. Vacuum and wash the floor with DETER PARQUET (see technical data sheet).

ORDINARY MAINTENANCE

2. In a bucket, prepare the water + RAVVIVANTE solution (1-2 cups of product per litre of water) and distribute it evenly with a well wrung cloth.
3. Let dry without rinsing. This type of use does not need any additional polishing.

EXTRAORDINARY MAINTENANCE

2. Pour pure RAVVIVANTE in a bucket or a small amount of it on the floor and distribute it evenly with a moist cloth.
3. Let dry. To obtain a more intense “reviving” effect, polish by hand using a wool cloth or a polishing machine equipped with felt discs.
4. Let dry without rinsing.

PROFESSIONAL TIPS

Recommended also for the protection of marble and tile floors (use pure during extraordinary maintenance).

STANDARD
USE

To be diluted

EXTRAORDINARY
USE

Ready
to use

Oiled or waxed
wood floor

DETEROL

Concentrated soap rich in vegetable oils for the ordinary maintenance of oiled or waxed wood floors.

- Concentrated solution to be diluted
- It maintains the original look of the finish
- Deeply cleanses and nourishes wood

INSTRUCTIONS FOR USE

1. Vacuum the floor.
2. Dilute 1-2 caps of DETEROL in approx. 1 litre water.
3. Wipe the floor with a soft cloth or a mop soaked in the solution and well wrung.
4. Let dry without rinsing.

PROFESSIONAL TIPS

We recommend the use of two buckets: one with the detergent solution, the other with clean (lukewarm) water, to regularly rinse the cloth to remove collected dirt.

STANDARD
USE

To be diluted

DERGOS

Soap and emulsified wax mixtures DERGOS can be used as an alternative to DETEROL to obtain greater protection and shine. It is available in two versions: clear or white.

- Concentrated solution to be diluted
- Regenerates the original finish
- Cleanses and nourishes wood

INSTRUCTIONS FOR USE

1. Vacuum the floor.
2. Dilute DERGOS in water (1 part of DERGOS until 20 parts of water – see technical data sheet).
3. Wipe the floor with a soft cloth or a mop soaked in the solution and well wrung.
4. Let dry without rinsing.
5. To obtain a more even and shiny surface polish by hand with a wool cloth or with a polishing machine with felt discs.

To be diluted

PROFESSIONAL TIPS

We recommend the use of two buckets: one with the detergent solution, the other with clean (lukewarm) water, to regularly rinse the cloth to remove collected dirt.

CARSOL

Impregnating restoring solution for the extraordinary maintenance of oiled floors (not suitable for waxed floors). When applied on worn or damaged areas, extends the duration of the treatment.

- Repairing oil for worn or damaged areas
- Double action: on the surface and in-depth
- Available in different colours

INSTRUCTIONS FOR USE

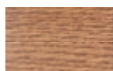

1. Clean the surface well using our wood soap DETEROL (for a more thorough degreasing use DETER PARQUET - see label) and let it dry.
2. Apply CARSOL in a very thin and even layer with a cloth or pad, rubbing very well to facilitate penetration.
3. Once dry, it is possible to polish by hand using a wool cloth or a polishing machine equipped with felt discs.
